RE: TALON™ Grasping Device BX00711175 – Device Material Change

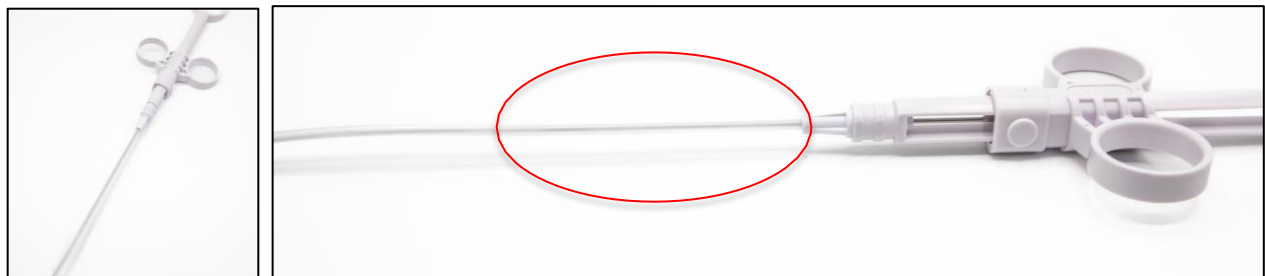

Dear Valued Customer,

STERIS has changed our catheter for the TALON Grasping Device to make our supply chain more robust. While the device will appear visually different, our testing has confirmed the performance of the device remains unchanged. We will begin shipping these new devices around mid-March 2024.

Please reference the images below for identifying the differences. PREVIOUS:
