**PACKAGING ENHANCEMENT FOR BIOLOGICAL INDICATORS AND  
PROCESS CHALLENGE DEVICES**

Dear Valued Customer,

STERIS will be implementing a packaging enhancement for select biological indicators (BIs) and process challenge devices (PCDs).

The new packaging will provide enhanced stability in the shipping and handling process. This new packaging will contain the same number of BIs and PCDs as the current packaging as well as the same labelling.

For more information on impacted products and timelines, please see Appendix A and B.

STERIS strives to provide the highest level of Customer support in the industry. As part of that commitment, we want to provide you with sufficient advance notice of this packaging enhancement.

We are pleased to assist you with incorporation of this new packaging in your facility. If you have any questions or require further support, please contact your STERIS Sales Representative.

Sincerely,

Michael McGrath  
Vice President, Canada
