Notice: STERIS/Key Surgical Instrument Cleaning Brush Consolidation

Dear Valued Customer,

To improve your product selection and purchasing process for instrument cleaning brushes from STERIS, we will be consolidating our Instrument Cleaning Brush portfolio. This consolidation will remove duplicate SKUs, which are a result of the integrated STERIS and Key Surgical portfolios.

This change will take effect on January 1, 2024.

We recognize the impact that this may have on your operations however we are confident this will be a positive change; one that will support your inventory optimization needs while continuing to provide you with the largest selection of instrument cleaning brush sizes and styles for manual cleaning.

To ensure a smooth transition, please begin updating your ordering system to reflect the replacement item numbers listed in the included cross-reference (see Appendix A). For ease of data extraction and/or uploading to your ordering system, you may also [download](#) the Excel format of the cross-reference.

Thank you for choosing to do business with STERIS. We look forward to strengthening our partnership and continuing to provide you with superior Customer service and value. Please review the Frequently Asked Questions included with this communication, which may provide you with additional information needed to assist you with the change. For all other questions or assistance, please contact your STERIS Sales Representative.

Sincerely,

A handwritten signature in black ink, appearing to read "M McGrath".

Michael McGrath
Vice President, Canada

Frequently Asked Questions

Q: How does this impact my GPO agreement?

A: Our team has confirmed that all the replacement brush SKUs exist on all relevant agreements so you should not see any change to your GPO agreements

Q: What happens to item numbers that are not on the list?

A: There are no changes to existing item numbers that are not on the included list of replacements; you will be able to continue to order and receive these items under the same item numbers

Q: Can I obtain a sample of the replacement brush before purchasing?

A: Yes, your STERIS sales representative can work with you to have brush samples sent to your facility

Q: Why is there a UOM change from the discontinued SKUs to the replacement SKUs?

A: We believe the unit of measures on the replacement SKUs will be valuable in helping our Customers optimize their inventory needs

Q: Will the consolidation affect shipping lead times?

A: As a result of this project, we expect the shipping lead times to remain the same, and likely improve

Appendix A – Instrument Cleaning Brush Cross-Reference
